
MT9V011 (MI-0360) ES2 Register Setting Addendum

Please refer to the most recent data sheet for additional information.
This document takes precedence over any datasheet for this product version (ES2).

Part #: MT9V011P11STC ES
ID Register: Register 0x00 = 0x8232 (Read only)

The list of registers below shows all registers that have had the power on default setting changed from the previous version (ES1). The table also indicates any power on defaults that need to be re-written after power up in order to ensure proper operation. Not doing so will result in a non-optimum performance of the sensor.

Power On Default Register Settings		Recommended Register Setting
Register Number (Hex)	Register Value (Hex)	Register Value (Hex)
0x00	0x8232	-
0x01	0x000A	-
0x02	0x0016	-
0x05	0x0083	-
0x30	0x0005	-
0x34	0x0100	-
0x3D	0x068F	-
0x40	0x01E0	-
0xFF	0x8232	-
